SUMMARY

Data Analyst with 4 years of experience developing scalable ETL pipelines, Power BI dashboards and analytical solutions. Proficient in SQL, Spark, Power BI, Databricks, Azure Data Factory and Dbt with hands-on experience in cloud platforms such as Snowflake.

EXPERIENCE

UnitedHealth Group

September 2025 – Present

Data Analytics Developer II

- Created 65+ stored procedures and ETL pipelines to process and transform healthcare claims data across multiple downstream systems, enabling real-time reporting for claims processing, adjudication and provider reimbursements.
- Implemented automated data quality framework with 20+ validation checks across source systems and gold-layer tables, detecting and preventing 95%+ of data anomalies before downstream impact on audit reporting.
- Developed AI agents using Anthropic Claude and Microsoft Co-pilot to enable natural language querying of claims data and gain data quality insights, accelerating ad-hoc analysis turnaround time by 70%.
- Deployed Power BI dashboards tracking \$500M+ in annual claims payments, enabling leadership and audit teams to identify \$2M+ in payment discrepancies through gap analysis on denial rates and claim adjudication trends.

Syracuse University

September 2024 – May 2025

Data Analyst Intern

- Created ETL pipelines using Data Factory, Databricks and Delta Lake to process 50M+ records for supply chain inventory.
- Enabled \$200K+ annual profits by identifying trending items and drove inventory restocking through data insights.
- Optimized data partitioning and caching strategies, reducing Power BI dashboard reporting latency by 45%.
- Constructed 15+ Dbt models in Snowflake to transform raw alumni data into star schema, to build materialized views/tables for Tableau dashboard supported alumni engagement and networking initiatives for university students.

Prompt Marketing Agency

June 2024 – August 2024

Data Science Intern

- Engineered scalable ETL pipelines using PySpark to aggregate and transform 2.5M+ engagement records across LinkedIn, Instagram and Facebook, enabling same day insights for media strategy teams.
- Built SQL data validation checks to identify nulls, duplicates and data type mismatches across ads data on cloud storage.
- Analyzed Lidl CEO's LinkedIn social profile using SQL, Talkwalker and LLMs, drove 6 million boost in user engagement.
- Improved content-strategy through A/B testing and analyzing CTR/ROAS/CAC on emails, ads, landing pages and reels.

National Stock Exchange

July 2020 – July 2022

Data Engineer

- Developed FIX API to ingest and migrate over 300 million daily financial trading records from brokerages, exchanges and clearing firms, enhancing real-time data cleaning, processing for downstream analytics.
- Implemented real-time data ingestion and transformation pipelines using Spark Streaming, improving ETL automation.
- Leveraged Delta Lake on Databricks to implement data integrity checks, schema evolution, and quality controls for incremental loads and batch processing, ensuring reliability for downstream analytics.
- Designed scalable data pipeline monitoring framework with 10+ custom alerting rules for schema drift, null value spikes, and processing bottlenecks, strengthening governance for millions of daily trading records.

EDUCATION

Syracuse University

August 2022 – May 2024

Master of Science in Data Science

- Relevant Coursework: Information Systems, Database Management, Data Visualization, Data Warehousing & Modeling

University of Mumbai

August 2016 – June 2020

Bachelor of Engineering in Computer Science

- Relevant Coursework: Data Structures, Data Engineering, Algorithms, Exploratory Data Analysis, Data Mining, NLP

SKILLS

Programming Languages: Python, SQL, NoSQL, HTML, CSS

Packages: NumPy, Pandas, Plotly, Seaborn, Matplotlib, PySpark, SparkSQL

Cloud Platforms: Snowflake, Dbt, Airflow, Azure Data Factory, Databricks, Synapse, AWS S3, Redshift

Data Engineering: Hadoop, Spark, Data/Delta Lakes, Data Warehouses, Data Lineage, Data Modeling, Data Governance

Tools: PostgreSQL, MySQL, MongoDB, CRM, ERP, SAS, SAP, Tableau, Power BI, Looker, Alteryx, Excel

Methodologies: GitHub, Docker, Jira, Visio, SDLC, Agile, Scrum, Waterfall, CI/CD pipelines
